

 **ATLAS**

THE **WORLD** OF LUXURY LIVING

Since the establishment in 1994, we have set standards, from which we still do not deviate. These are high aesthetic values, modern design and uncompromising quality. The skillful hands of our craftsmen shape the material and turn the ideas into reality. Cooperation with renowned European and domestic designers, the selection of quality materials and the passion that we bring into each product has contributed to Atlas having its place in the furniture world. From a small handcraft workshop with only three workers, Atlas has grown into a modern company with 160 workers thanks to big effort, hard-work and commitment. The demands of the contemporary market pose new challenges before us and we are ready to respond to them.

Our products are characterized by the use of cutting-edge materials and modern technologies, as well as perfect comfort, all for the sake of satisfaction of our customers. Hand-painted, high-quality Italian leather, best fabrics and feathers, modern motorized relaxing mechanisms, high-elastic foam, quality wooden construction made of beech massive, are carefully packed into a product that ranks with the products of the world's most famous furniture brands.

HANDMADE

Each product has been carefully shaped with the skillful hands of our craftsmen. They turn ideas into reality and pay attention on every detail, because the details make a difference. Atlas has built its reputation on getting the details right, from durable wooden frames to double-stitched seams through using handcrafted methods, as well as the innovative ones.

MODULAR DESIGN

For years in-house design team together with Italian and French outsourced experts, have been creating innovative and beautiful furniture. Dedication and loyalty that our designers put into every product has resulted in development of new category - modular sofas that reflect luxury through quality, comfort and elegance. Unlike traditional, modular sofas have been designed in order to provide a great space for customization and flexibility. This type of sofa offers an endless number of configurations, so it can be combined into formal setting, cozy corner sofa and even bed.

QUALITY SUPPORT

Atlas has built a reputation by making supportive, comfortable and durable sofas thanks to strong wooden frames, best motorized relax and sofa bed mechanisms, and high quality memory foam and feather overlay available for some models.

CONSTRUCTION

High quality wooden construction made of solid beech wood provides reliable support and maintain the same look over the years. Together with improved seating system this long lasting construction provides outstanding comfort for which the sofas are famous for.

In special segment of sofa beds the supportive system uses the best mechanisms developed in-house and transformable beds of respected Italian producers with mattresses from 12 to 18 cm thick made from high-elastic or memory foam. The important fact is that the sleeping function of these pieces of furniture does not influence their use during the day.

COMFORT

Selected sofa designs feature the finest feather overlay and high resilience memory foam which offers an exceptional level of comfort and support. The feather overlay is designed so that furniture shows a casual appearance and gives sensation of sinking into the sofa. The memory foam is used to keep its shape and provide soft but firm support.

LUXURY MATERIALS

Atlas offers a choice of the finest Italian leathers and premium fabrics

Leather is a fine material that provides the products distinguished by tactile pleasure, exclusive comfort and constant temperature due to its basic nature. The highest quality leathers are sourced exclusively from leading Italian tanneries known for their traditions. They make collections of more than 12 leathers in over 70 different colors, which are continuously renewed and updated.

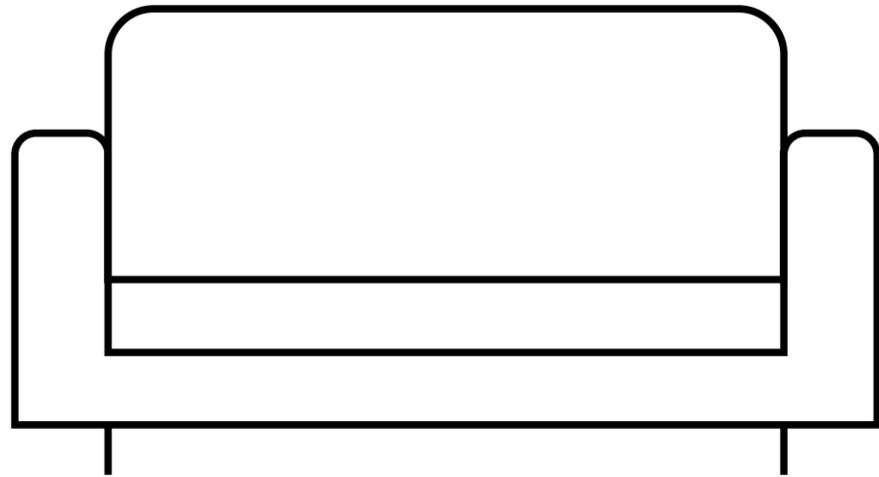

The beautiful collection of more than 50 fabrics in over 500 different colors, which are continuously renewed and updated, is available for each Atlas sofa, bed, and even chair. Every fabric design has been carefully selected and sourced from well-known European factories, where they are rigorously tested. Some belong to special collection of flame retardant fabrics, but there is a number of those that are licensed as water repellent, easy cleanable and pet friendly.
